SUBJECT INDEX

A
Acacia caffra, triflavanoids from heartwood of 1023
Aconitum napellus, acylated flavonol glycosides from 543
Agavaceae 489
Ageratum houstonianum, pyrrolizidine alkaloids from 1269
Aglaia, insecticidal flavaglines from 57
Algae 459, 529, 607, 633, 787
Alkaloid content, in lupin seeds, correlation of with polyamine and basic amino acid content 43
Alkaloids,
  dihydroxynortropane, from calystegine-producing plants 721
  from *Haplophyllum* 597, 1277
  furanopyridine, from *Sarcomelicope* bark 593
  gluco-, from *Strychnos*, glucosidase conversion products of 653
  indole,
    cytotoxic, from *Centaurea* seeds 1273
    from *Kopsia* 603
  N-methoxycarbonylaporphine, from *Rollinia*, antiplatelet activity of 421
  pentacyclic oxindole, from *Uncaria*, ^{15}N NMR studies of 781
  pyrrolizidine, from *Ageratum* 1269
Alkenone, antibacterial, from *Amomum* rhizomes 1281
Alliaceae 565, 1219
Allium porrum, flavonoids from 565
A. tuberosum, steroidal saponin from 1219
Aluminium, uptake and speciation of in *Brassica* 189
Amaryllidaceae 33
2-Aminobenzaldehyde biosynthesis, in *Robinia* and *Philadelphus* flowers 361
Amomum aculeatum, dioxa-dispiroketal and alkenone from 1281
Anabaena, fatty acid profiles in planktonic species of 727
Anacardiaceae 915
Annonaceae 421
Anthocyanins, *trans-cis* isomerization of coumaric acid moieties and colour variance of 791
Antioxidant enzymes, in radish tissues, responses of to cadmium 701
Antioxidants, lipophilic, from Iryanthera fruits 437
Apiaceae 135, 513, 1197, 1201
Apocynaceae 603, 669
Arabidopsis thaliana,
  biosynthesis of benzoic acid glucosinolate esters in 23
  botrydial production in *Botrytis*-infected tissues of 689
  brassinosteroid biosynthesis in 171
  cuticular waxes on *eceriferum* mutants of 115
  differential expression of two cinnamoyl-CoA reductase genes from 1187
Arachis hypogaea, regiospecificity of endoplasmic oleoyl-phosphatidylcholine desaturase from 643
Araliaceae 365
Asclepiadaceae 507, 1213
Aspergillus ochraceus, biosynthesis of diaporthin and orthosporin by 165
Asteraceae 99, 109, 125, 267, 417, 523, 559, 571, 811, 823, 1105, 1123, 1269, 1273
Aureoubra lagunensis, sterol composition of 787
Avena sativa, bonding of hydroxycinnamic acids to lignin in cell walls of 987

B
Bacteria 1135
Bassia muricata, acylated flavonol glycosides from 1259
Bazzania trilobata, detection of chlorinated bisbenzyls in by MALDI-TOF MS 303
Benzoic acid glucosinolate esters, biosynthesis of in *Arabidopsis* 23
Benzophenone, from *Davallia*, interaction of with P-glycoprotein 553
Benzophenone *O*-glucoside, from Hypericum 1237
Benzopyrans,
  from *Hypericum* 1227
  from *Mallotus* 273
Benzyl isothiocyanate, the sole anthelmintic principle of papaya seeds 427
Betula pubescens, seasonal variation of hydrolyzable tannins in 15
Betulaceae 15
Biflavonoids, from *Ochna* 579
Bifurcaria bifurcata, acyclic diterpenes from 529
Bignoniaceae 1245
Bioactive plant products,
  allelopathic
    cyanobacterial cyclic peptide, from *Nostoc* 613
    sesquiterpenoids, from *Petasites* rhizomes 109
  anthelmintic isothiocyanate, from papaya seeds 427
  antibacterial
    alkenone, from *Amomum* 1281
    dioxa-dispiroketals, from *Amomum* 1281
  antifungal
    essential oils, from *Chrysanthemum* flowerheads 99
    polysulphides, from *Petiveria* 743
  antimycotic conversion products of gluco-alkaloids, from *Strychnos* 653
  antinociceptive sesquiterpene drimane, from *Drimys* 103
  anti-oomycete cyclohexenone epoxides, from endophytic fungus 261
  antioxidant lignans and tocotrienols, from *Iryanthera* fruits 437
  antiplatelet
    active *N*-methoxycarbonyl aporphines, from *Rollinia* 421
    aggregation active phenolics, from *Dendrobium* 1255
  antiprotozoal dioxa-dispiroketals, from *Amomum* 1281
  cardioactive spiganthines and ryanodines, from *Spigelia* 285
  cytotoxic
    dioxa-dispiroketals, from *Amomum* 1281
    diterpenoid, from *Colophospermum* 537
    indole alkaloids, from *Centaurea* seeds 1273
    prenylated flavonoids, from *Deguelia* 77
    triterpene glycosides, from *Sanguisorba* 773
  ecdysteroid antagonist activity, of oligostilbenes from *Carex* seeds 393
  P-glycoprotein modulatory benzophenone, from *Davallia* 553
  immunosuppressive cyclic peptides, from linseed 251
  insect antifeedant spiganthines and ryanodines, from *Spigelia* 285
  insecticidal
    activity, of essential oils from *Ocimum* 385
    flavaglines, from *Aglaia* 57
  mitochondrial respiration-inhibiting essential oils, from peppermint 91
  phytoalexins, from nematode-infected *Pinus* bark 223
  phytoecdysteroids, bioactivity of 325
  snail antifeedant glycoalkaloids, from potato, synergistic activity of 229
Biodiversity, conservation and utilization of, in Brazil 621
Biological activity, of oligogalacturonides 929
Biosynthesis,
  of alkaloids, in *Strychnos* 653
  of 2-aminobenzaldehyde, in *Robinia* and *Philadelphus* flowers 361
  of benzoic acid glucosinolate esters, in *Arabidopsis* 23
  of biopolymers, in woody plants 803, 805, 1043

PII: S0031-9422(01)00351-X

of brassinosteroids, in *Arabidopsis*, pea and tomato 171
of chelidonic acid, in *Leucojum* 33
of coniferyl alcohol, in *Pinus* 1095
of diaporthin and orthosporin, by *Aspergillus* 165
of dihydroconiferyl alcohol, in *Pinus* 1095
of (1→3),(1→4)(β-D-glucans, in maize 1045
of glycan-containing oligomers, in cotton and wood 975
of hydrolyzable tannins, in *Quercus*, *Rhus* and *Tellima* 915
of 2-hydroxy-1,4-benzoxazin-3-one, in *Zea* 373
of lignin,
role of caffeoyl CoA *O*-methyltransferase in 1177
transcriptional control of, by tobacco LIM protein 1149
of monolignols, in alfalfa 1069
of pectins, in plant cell walls 929
of phytoecdysteroids, in plants 325
of rubber, in *Ficus*, *Hevea* and *Parthenium* 1123
of terpene moieties of isoprenyl phenyl ethers, in *Trichocolea* 7
Biotransformation,
of (+)- and (−)-camphorquinones, by *Nicotiana* and *Catharanthus* cells 669
of flavanones, by *Caldariomyces* 341
of geranyl acetate to geraniol, by *Cymbopogon esterase* 675
of (*R*)-(+)- and (*S*)-(−)limonene, by fungi 199
of squamulosone, by *Curvularia* 377
Bisbibenzyls, chlorinated, from *Bazzania*, detection of by MALDI-TOF MS 303
Borate esters, cross-linking macromolecular pectin in *Beta* 969
Botrydial, in *Capsicum*, *Phaseolus* and *Arabidopsis* infected by *Botrytis* 639
Botrytis cinerea, botrydial production in plant tissues infected by 689
Brassica rapa pekinensis, uptake and speciation of aluminium in 189
Brassicaceae 23, 115, 171, 189, 547, 693, 701, 811, 1187
Brassicales, glucosinolates on leaf surface of, and oviposition of cabbage root fly 693
Brassinosteroid biosynthesis, in *Arabidopsis*, pea and tomato 171
Brugmansia candidia, cadaverine in hairy roots of 759
Bufadienolides, from *Helleborus* 401
Bursaphelenchus xylophilus, phytoalexins from *Pinus* bark infected with 223

C
Cadaverine, in transformed root cultures of *Brugmansia* 759
Caesalpinia minax, furanoditerpenoid lactones from 517
Caffeic acid *O*-methyltransferase deficient plants, study of lignins of by NMR 993
Caffeoyl CoA *O*-methyltransferase, role of in lignin biosynthesis 1177
Caldariomyces fumago, enzymatic halogenation of flavanones by 341
Camphorquinones, (+)- and (−)-, biotransformation of by *Nicotiana* and *Catharanthus* cells 669
Capparidaceae 693
Capsicum annuum, botrydial production in *Botrytis*-infected tissues of 689
Caralluma penicillata, C-15 oxypregnane glycosides from 1213
Carex pendula, ecdysteroid antagonist activity of oligostilbenes from 393
Carica papaya, benzyl isothiocyanate as sole anthelmintic principle of 427
Caricaceae 427
Cassia kleinii, oxanthrone esters from 583
Catharanthus roseus, biotransformation of (+)- and (−)-camphorquinones by 669
Cell wall
architecture, of wheat in a microgravity environment 835
biosynthesis, in cotton 975
constituents, study of by Fourier transform infrared microscopy 811
lignification, ultrastructural aspects of 859
Cellulose
synthase, structure-function characterization of 1135
synthetic sites, localization of sucrose synthase at 823
Centaurea bracteata, flavonoids from 559
C. cyanus, cytotoxic indole alkaloids from seeds of 1273
Chelidonic acid biosynthesis, in *Leucojum* 33
Chemotaxonomic studies,
of dihydrochalcone di-C-glycoside, in *Fortunella* 737
of dihydroxynortropane alkaloids, in Convolvulaceae and Solanaceae 721
of essential oils,
in *Hyptis suaveolens* populations 733
in *Laurus azorica* populations 245
in mosses 443
in *Origanum vulgare* ssp. *vulgare* 65
in *Satureja* species 71
in *Stachys* subsection Swainsonianeae 235
of fatty acids, in *Anabaena* species with straight trichomes 727
of flavonoids, prenylated, in *Deguelia* 77
of high molecular weight lipids, in trilaminar outer wall-containing microalgae 459
of 3-*O*-methyl-D-galactose residues, in lycophyte primary cell walls 711
of phytoecdysteroids, in higher and lower plants 325
of quinonemethide pigment, in *Dalbergia* heartwood 1013
Chenopodiaceae 969, 1259
Chlorella emersonii, high molecular weight lipids from 459
Chrysanthemum coronarium, antifungal activity of essential oil from 99
Cichorium intybus, sesquiterpene lactones from 523
Cinnamoyl-CoA reductase genes, from *Arabidopsis*, differential expression of 1187
Cinnamyl
alcohol dehydrogenase-deficient plants, study of lignins of by NMR 993
alcohols and aldehydes, oxidation of by basic peroxidase from *Zinnia* 1105
Citrus aurantifolia, NMR studies of fruit cuticle polyesters of 1035
C. sinensis, metabolism of indole-3-acetic acid by flavedo tissue of 179
Clusia rosea, nemorosone from floral resins of 279
Clusiaceae 279, 1227, 1237
Colophospermum mopane, diterpenes from 537
Compression wood formation, induction of, in Douglas fir in microgravity 847
Coniferyl alcohol metabolism, in pine 1085, 1095
Convolvulaceae, dihydroxynortropane alkaloids from 721
Cornaceae 1287
Cornus capitata, ellagic acid methyl ether glycoside and iridoids from 1287
Corynespora cassiicola, biotransformation of (*R*)-(+)- and (*S*)-(−)-limonene by 199
Coumaric acid moieties, influence of *trans-cis* isomerization of, on colour variance of anthocyanins 791
Coumarins, monoterpene, from *Ferula* 1201
Crataegus pinnatifida, flavonoid ketohexose furanosides from 1249
Croton eluteria, clerodane diterpenoids from 1209
Cucurbita maxima, acidolysis of induced lignin-like material from 1005
Cucurbitaceae 1, 1005
Curvularia lunata, squamulosone biotransformation by 377
Cuticle polyesters, from *Citrus*, NMR studies of 1035
Cuticular waxes, on *eceriferum* mutants of *Arabidopsis* 115
Cyanobacteria 613, 727
Cyclohexenone epoxides, anti-oomycete, from *Pestalotiopsis* 261
Cymbopogon martinii, transformation of geranyl acetate to geraniol in 675
Cyperaceae 393

D
Dalbergia, quinone methide pigment from callus cultures of 1013
D. sissoo, isoflavonoid glycosides from 1263
Davallia solida, interaction of benzophenone from, with P-glycoprotein 553
Deguelia, prenylated flavonoids from 77
Delonix regia, primary sequence determination of Kunitz inhibitor from 625
Dendrobium densiflorum, phenolics with antiplatelet aggregation activity from 1255
6-Deoxocathasterone, accumulation of in *Arabidopsis*, pae and tomato 171

Diaporthin, biosynthesis of by *Aspergillus* 165
Dioxa-dispiroketal, cytotoxic, antiprotozoal and antibacterial, from *Amomum* 1281
Dipsacaceae 51
Dirigent protein gene expression, and dirigent site localization in *Forsythia* 883
Diterpenoid lactones, from *Caesalpinia* seeds 517
Diterpenoids,
acyclic, from *Bifurcaria* 529
clerodane, from *Croton* 1209
from *Colophospermum* 537
ent-pimarane, from *Dysoxylum* 131
cDNA, coding for class II cinnamate hydroxylase, expression of leading to reduced production of lignin 1159
Dolichantoside, from *Strychnos*, glucosidase conversion product of 653
Drimys winteri, antinociceptive sesquiterpene drimane from 103
Duboisia leichhardtii, dihydroxynortropane alkaloids from 721
Dysoxylum hainanense, *ent*-pimaranes from 131

E
Ecdysteroids, from *Helleborus* 401
Echinacea pallida, methyl jasmonate treatment of 417
Elattostachys apetala, triterpenoid saponins from 469
Ellagic acid
methyl ether glycoside, from *Cornus* root cultures 1287
rhamnosides, from *Eucalyptus* bark 587
Enydra anagallis, melampolides from 125
Eruca sativa, quercetin 3,3′,4′-tri-*O*-glycosides from 547
Essential oils,
from *Chrysanthemum* flowerheads, antifungal activity of 99
from *Laurus* 245
from *Mentha*, effect of on cucumber respiration 91
from *Ocimum*, toxicity of in post-harvest insect pests 385
from *Origanum* 65
from *Satureja* spp., variability of 71
from *Stachys* subsection Swainsonianeae 235
of *Hyptis*, chemical variability of 733
Eucalyptus globulus, ellagic acid rhamnosides from 587
Euphorbiaceae 273, 1123, 1209
Eurycoma harmandiana, quassinoids from 1205

F
Fabaceae 43, 77, 171, 349, 361, 517, 537, 583, 625, 643, 1013, 1023, 1061, 1069, 1223, 1263
Fagaceae 915
Fatty acid profiles, in *Anabaena* species with straight trichomes 727
Fatty acids, polyhalogenated homosesquiterpenic, from *Plocamium* 607
Fernandoa adenophylla, lignan and phenylpropanoid glycosides from 1245
Ferula ferulago, monoterpene coumarins from 1201
F. sinaica, eudesmanolide and carotane from 513
Ficus elastica, rubber biochemistry in 1123
Flavaglines, insecticidal, from *Aglaia* 57
Flavanone
Diels–Alder adducts, from *Morus* 1231
phytoalexin, from nematode-infested *Pinus* bark 223
Flavanones, enzymatic halogenation of, by *Caldariomyces* 341
Flavone
glucuronide esters, form *Helicteres* 297
glycosides, acylated, from *alfalfa* 1223
Flavones, external, from *Psiadia* 571
Flavonoid ketohexose furanosides, from *Crataegus* leaves 1249
Flavonoids,
dihydrochalcone, as chemotaxonomic markers in *Fortunella* 737
from *Centaurea* 559
from leek 565
prenylated, from *Deguelia* 77
Flavonol
glycosides, acylated,
from *Aconitum* flowers 543
from *Bassia* 1259
3,3′,4′-tri-*O*-glycosides, from *Eruca* 547
triosides, from *Reseda* 575
Forsythia intermedia,
dirigent proteins and dirigent sites in lignifying tissues of 883
in situ hybridization and immunolocalization of lignan reductases in 899
Fortunella, phloretin 3′,5′-di-C-glucoside as chemotaxonomic marker in 737
Fructans, from leaves of New Zealand flax 661
Frullania tamarisci, pacifigorgiane and tamariscane sesquiterpenes from 307
Fungi 149, 165, 199, 261, 341, 377, 689
Furanoditerpenoid lactones, from *Caesalpinia* seeds 517

G
β-Galactosidase isoforms, from mung bean seedlings 349
Genomics, and phytochemistry 145
Geraniol, transformation of geranyl acetate to, during palmarosa inflorescence development 675
Geranyl acetate cleaving esterase, form *Cymbopogon* 675
Gibberellins, endogenous, in immature peach seeds 749
Ginsenoside production, in *Panax* transformed root phenotypes 365
Glucosinolate esters, of benzoic acid, biosynthesis of in *Arabidopsis* 23
Glucosinolates, on Brassicales leaf surfaces, and oviposition of cabbage root fly 693
Glycoalkaloids, from potato, synergism of in inhibiting snail feeding 229
Glycoproteins, cell-wall-associated, from Sitka spruce xylem, selective insolubilization of 157
Glycosyl transfer, in (1→4)β-D-glycans, possible multi-site mechanism of 1045
Glycosyltransferases,
cellulose synthase as prototype of 1135
differential behaviour of in different solvents 1055
Gossypium hirsutum,
glycan-containing oligomers in developing fibres of 975
polygalacturonase inhibiting protein from 149

H
Halogenation, enzymatic, of flavanones and flavones 341
Haplophyllum acutifolium, alkaloids from 1277
H. tuberculatum, alkaloids from 597
Heartwood formation, in *Forsythia* 899
Helicteres isora, isoscutellarein 4′-methyl ether 8-glucuronide esters from 297
Helix aspera, synergism between potato glycoalkaloids in inhibition of feeding of 229
Helleborus torquatus, ecdysteroids and bufadienolides from 401
Hepaticae 7, 303, 307, 479, 499
Hevea brasiliensis, rubber biochemistry in 1123
Hordeum vulgare, chemical profiling of root exudates of by NMR and MS 209
Hydroquinones, from *Plagiochila* 479
2-Hydroxy-1,4-benzoxazin-3-one biosynthesis, in maize 373
Hydroxycinnamic acids, bonding of to lignin in grass cell walls 987
Hydroxyproline *O*-glycosylation, of cell wall proteins, codes of 319
Hypericum annulatum, benzophenone *O*-glucoside from 1237
H. polyanthemum, benzopyrans from 1227
Hyptis suaveolens, chemical variability of essential oils from 733
H. verticillata, biotransformation of sesquiterpene from 377

I
Indole-3-acetic acid, metabolism of by orange flavedo tissue 179
Iridoid glucosides,
from *Cornus* root cultures 1287
from *Uncaria* 781
Iryanthera juruensis, lipophilic antioxidants from 437
Isoflavonoid glycosides, from *Dalbergia* 1263
Isoprenyl phenyl esters, from *Trichocolea*, biosynthesis of 7

J
Jesterone, from *Pestalotiopsis* 261

K
Kopsia flavida, methyl chanofruticosinates from 603
Kunitz inhibitor, from *Delonix*, primary sequence determination of 625

L
Lamiaceae 65, 71, 91, 235, 377, 385, 733
Laminariaceae, vanadium haloperoxidases from 633
Lauraceae 245
Laurus azorica, essential oils in populations of 245
Leucojum aestivum, chelidonic acid biosynthesis in 33
Lignan
  glycoside, from *Fernandoa* 1245
  reductases, in woody tissues, *in situ* hybridization and immunolocalization of 899
Lignification, of transgenic tobacco plants, changes of 875
Lignin
  biosynthesis,
    effect of *O*-methyltransferase gene repression on 1167
    role of caffeoyl CoA *O*-methyltransferase in 1177
    transcriptional control of, by tobacco LIM protein 1149
  composition, of wheat in a microgravity environment 835
  synthesis, by basic peroxidase from *Zinnia* 1105
  topochemistry, ultrastructural aspects of 859
Lignin-heteroxylan association, in the phenolic fraction of maize bran 765
Lignin-like material, induced in squash fruit, acidolysis of 1005
Lignins, of CAD- and COMT-deficient plants, study of by NMR 993
Liliaceae 791
Limonene isomers, biotransformation of by fungi 199
Linaceae 251
Linum usitatissimum, cyclic peptides from 251
Lipids, from trilaminar outer wall-containing microalgae 459
Loganiaceae 285, 653
Lupinus, equilibrium among basic nitrogen compounds in 43
Lycopersicon esculentum, brassinosteroid biosynthesis in 171
Lycophyta, 3-*O*-methyl-D-galactoside, in primary cell walls of 711

M
Mallotus apelta, benzopyrans from 273
Malus domestica,
  seasonal variation of monoterpene emission from 681
  volatile emission by fruits of, induced by codling moth 409
Malvaceae 149, 975
Medicago sativa, acylated apigenin glycosides from 1223
Meliaceae 57, 131
Melothria japonica, serine endopeptidase from 1
Mentha × *piperita*, effect of essential oils from on cucumber respiration 91
3-*O*-Methyl-D-galactoside, in lycophyte primary cell walls 711
Methyl jasmonate, inducing increased production of alkamides and polyacetylenes in *Echinacea* 417
Monolignols, biosynthesis of 1069
Monoterpene emission, from apple and cherry, seasonal variation of 681
Monoterpenoids,
  from *Plagiochila* 479
  from *Prangos* 135
Moraceae 1123, 1231
Morus cathayana, flavanone Diels–Alder adducts from 1231
Musci, volatiles from 443
Myoinositol, from *Viguiera* glandular trichomes 267
Myristicaceae 437
Myrtaceae 587

N
Nemorosone, from *Clusia* floral resins 279
Nicotiana tabacum,
  biotransformation of (+)- and (−)-camphorquinones by 669
  effects of *O*-methyltransferase gene repression in transgenic plants of 1167
  qualitative changes in lignification of transgenic plants of 875
  reduced production of lignin in, by expression of cDNA coding for CYP73A15 1159
Nitrogen compounds, basic, in lupin with high and low alkaloid content 43
Nostoc 31, allelopathic cyanobacterial cyclic peptide from 613

O
Ochna afzelii, biflavonoids from 579
Ochnaceae 579
Ocimum, blend effects in the toxicity to insects of essential oils from 385
Oleaceae 883, 899
Oleoyl-phosphatidylcholine desaturase, from peanut, regiospecificity of 643
Oligogalacturonides, induction of signalling cascades by 929
Oligostilbenes, from *Carex* seeds, ecdysteroid antagonist activity of 393
Orchidaceae 1255
Origanum vulgare, essential oil of 65
Orthosporin, biosynthesis of by *Aspergillus* 165
Oxanthrone esters, from *Cassia* 583
Oxidative pentose phosphate pathway, role of in *Robinia* heartwood formation 1061

P
Palicoside, from *Strychnos*, glucosidase conversion product of 653
Panax ginseng, ginsenoside production in transformed roots of 365
Parthenium argentatum, rubber biochemistry in 1123
Pectins,
  from *Beta*, composition of 969
  structure, biosynthesis and biological activity of 929
Penicillium digitatum, biotransformation of (*R*)-(+)- and (*S*)-(−)-limonene by 199
Peptides, cyclic,
  allelopathic, from *Nostoc* 613
  from linseed 251
Pestalotiopsis jesteri, anti-oomycete cyclohexenone epoxides from 261
Petasites japonicus, allelopathic sesquiterpenoids from 109
Petiveria alliacea, antifungal polysulphides from 743
Phaseolus vulgaris, botrydial production in *Botrytis*-infected tissues of 689
Phenolics, with antiplatelet aggregation activity, from *Dendrobium* 1255
Phenylpropanoid glycoside, from *Fernandoa* 1245
Phenylpropenoids, from *Psiadia* surface exudate 571
Philadelphus coronarius, 2-aminobenzaldehyde biosynthesis in 361
Phormiaceae 661
Phormium, fructans from 661
Phytoalexins, from nematode-infested *Pinus* bark 223
Phytochemistry, in the genomics and post-genomics eras 145
Phytoecdysteroids, distribution, structure, biosynthesis, bioactivity and applications of 325
Phytolaccaceae 743
Picea sitchensis, selective insolubilization of cell wall proteins from 157
Pinaceae 157, 223, 847, 899, 1085, 1095
Pinus, coniferyl alcohol and dihydroconiferyl alcohol biosynthesis in 1095
P. strobus,
  glucosidic turnover of cinnamyl aldehydes by glucosyltransferase from 1085
  stilbenoid and flavonoid phytoalexins from 223
Pisum sativum, brassinosteroid biosynthesis in 171
Plagiochila rutilans, hydroquinones and monoterpenoids from 479
Plocamium cartilagineum, polyhalogenated fatty acids from 607
Poaceae 209, 373, 675, 765, 835, 987, 1045
Polyamine, from transformed root cultures of *Brugmansia* 759
Polygalacturonase, from *Verticillium*, inhibition of by cotton protein 149
Polysaccharide synthases, differential behaviour of in different solvents 1055
Polysaccharides, containing 3-*O*-methyl-D-galactoside, from lycophyte primary cell walls 711

Polysulphides, antifungal, from *Petiveria* 743
Prangos tschimganica, monoterpenoids and (γ-pyrones from 135
Pregnane glycosides, from *Caralluma* 1213
Pregnenes, from *Solenostemma* 507
Protein, inhibitor of serine proteinase, from *Delonix* 625
Protein biochemistry,
caffeoyl CoA *O*-methyltransferase, role of in lignin biosynthesis 1177
cell wall proteins, from Sitka spruce xylem, selective insolubilization of 157
coniferyl alcohol glucosyltransferase, from pine cambium 1085
β-galactosidases, isoforms of, from mung bean seedlings 349
(1→3),(1→4)(-D-glucan synthase, mixed linkage, from maize 1045
glycoprotein, hydroxyproline-rich, *O*-glycosylation codes of 319
Kunitz inhibitor, from *Delonix* seeds, primary sequence determination of 625
peroxidase, basic, from *Zinnia*, oxidation of cinnamyl alcohols and aldehydes by 1105
polygalacturonase, from *Verticillium*, inhibition of by cotton protein 149
polysaccharide synthases, differential behaviour of in the presence of organic solvents 1055
rubber transferases, from *Hevea*, *Ficus* and *Parthenium* 1123
serine endopeptidase, from *Melothria* fruits 1
vanadium haloperoxidases, from Laminariaceae 633
Prunus avium, seasonal variation of monoterpene emission from 681
P. persica, endogenous gibberellins in immature seeds of 749
Pseudotsuga menziesii, compression wood formation induced by microgravity in 847
Psiadia punctulata, surface flavones and phenylpropenoids from 571
Pteridophyta 553
(+)-Pulegone, effect of on cucumber respiration 91
γ-Pyrones, from *Prangos* 135

Q
Quassinoids, from *Eurycoma* 1205
Quercus robur, biosynthesis and subcellular distribution of hydrolyzable tannins in 915
Quinone methide pigment, in callus of *Dalbergia* 1013

R
Ranunculaceae 401, 543
Raphanus sativus, responses of antioxidant enzymes from, to cadmium 701
Reseda murucata, kaempferol triosides from 575
Resedaceae 575, 693
Rhus typhina, biosynthesis of hydrolyzable tannins in 915
Robinia pseudoacacia,
2-aminobenzaldehyde biosynthesis in 361
role of oxidative pentose phosphate pathway in heartwood formation of 1061
Rollinia mucosa, antiplatelet activity of *N*-methoxycarbonyl aporphines from 421
Root exudates, from Gramineae, chemical profiling of by NMR and MS 209
Rosaceae 409, 681, 749, 773, 1249
Rubber biochemistry, comparison of, in *Hevea*, *Parthenium* and *Ficus* 1123
Rubiaceae 781
Rutaceae 179, 593, 597, 737, 1035, 1277
Ryanodines, cardioactive and insect antifeedant, form *Spigelia* 285

S
Sanguisorba officinalis, cytotoxic triterpene glycosides from 773
Sapindaceae 469
Saponins,
steroidal,
from *Allium* seeds 1219
from *Yucca*, structure elucidation of sugar moiety of, by MS and NMR 489
triterpenoid, from *Elattostachys* stem bark 469
Sarcomelicope megistophylla, furanopyridine alkaloids from 593
Satureja, variability of essential oils of 71
Saxifragaceae 361, 915
Scabiosa columbaria, chemical transformation of sweroside from 51
Scenedesmus communis, high molecular weight lipids from 459
Seco-iridoid, from *Scabiosa*, chemical transformation of 51
Serine endopeptidase, from *Melothria* fruits 1
Sesquiterpene
drimane, antinociceptive, from *Drimys* 103
hydrocarbons, trifarane, from *Trocholejeunea* 499
lactones,
from *Cichorium*, structure revision of 523
from *Smyrnium* 1197
from *Viguiera* glandular trichomes 267
melampolides, from *Enydra* 125
Sesquiterpenoids,
allelopathic, form *Petasites* rhizomes 109
from *Ferula* 513
from *Frullania* and *Valeriana*, enantiomeric to each other 307
from moss essential oils 443
Simaroubaceae 1205
Smyrnium olusatrum, sesquiterpene lactones from 1197
Solanaceae 171, 229, 669, 721, 759, 791, 875, 1115, 1149, 1159, 1167
α-Solanine, synergism with α-chaconine in inhibition of snail feeding 229
Solanum tuberosum,
poly(phenolic) domain of suberin from 1115
synergism between glycoalkaloids of in inhibition of snail feeding 229
Solenostemma argel, pregnenes from 507
Solid phase microextraction, of monoterpenoids from fungal cultures 199
Spiganthines, cardioactive and insect-antifeedant, from *Spigelia* 285
Spigelia, cardioactive and insect antifeedant constituents from 285
Squamulosone biotransformation, by *Curvularia* 377
Stachys, chemotaxonomic studies of essential oils in 235
Sterculiaceae 297
Sterol composition, of Texas brown tide alga 787
Stilbenoid phytoalexin, from nematode-infested *Pinus* bark 223
Strychnos mellodora, glucosidase conversion products of gluco-alkaloids from 653
Suberin poly(phenolic) domain, of wounded potato tubers 1115
Sucrose synthase, localization of at sites of high-rate cellulose synthesis 823
Sweroside, from *Scabiosa*, chemical transformation of 51

T
Tannins, hydrolyzable,
biosynthesis and subcellular distribution of 915
from *Betula*, seasonal variation of 15
Tellima grandiflora, biosynthesis of hydrolyzable tannins in 915
Tetraedron minimum, high molecular weight lipids from 459
Trichocolea tomentella, biosynthesis of isoprenyl phenyl esters from 7
Triflavanoids, with C–C and C–O–C interflavanyl bonds, from *Acacia* 1023
Triterpene glycosides, from *Sanguisorba* roots, cytotoxic activity of 773
Triticum aestivum,
cell-wall architecture of, in microgravity environment 835
chemical profiling of root exudates of by NMR and MS 209
Trocholejeunea sandvicensis, trifarane sesquiterpene hydrocarbons from 499
Tropaeolaceae 693

U
Uncaria tomentosa, iridoid and ^{15}N NMR studies of oxindole alkaloids from 781

V
Valeriana officinalis, sesquiterpenes from 307
Valerianaceae 307
Vanadium haloperoxidases, from brown algae 633
Verticillium dahliae, inhibition of polgalacturonase from by cotton protein 149
Vigna radiata, isoforms of β-galactosidases from 349
Viguiera quinqueremis, sesquiterpene lactones and myoinositol from 267

Volatiles,
from mosses 443
of apple fruit, induced emissions of by codling moth 409

W
Winteraceae 103
Woody plant biopolymers, biosynthesis of 803, 805

X
Xanthones, benzophenone *O*-glycoside as biogenetic precursor of 1237

Y
Yucca filamentosa, steroidal saponin from 489

Z
Zea mays,
β-glucan synthesis in 1045
2-hydroxy-1,4-benzoxazin-3-one biosynthesis in 373
lignin-heteroxylan association in the phenolic fraction of bran from 765
Zingiberaceae 1281
Zinnia elegans, cinnamyl alcohol and aldehyde oxidation by peroxidase from 1105
